

I think of the radio industry is going through the same issues as TV a number of years ago with the local programming vs. Cable tv. Please don't limit my XM radio. If local radio is having trouble competing I am sorry the need to improve there programming or team up with XM or something is what they need not laws limiting XM. Everyone is not going to pay for Satellite radio but those of us that do shouldn't have our programming limited because the radio industry doesn't want things to change. Compete we are in supply and demand economy. Thanks J...
